SHAPED BY LANDSCAPE

📍 FLANDERS

Shaped by Flanders' diverse landscapes, Heritage is deeply rooted in our rich history and culture.

From the ever-changing coastline in the west, to the iconic cobblestone roads and the fertile polders more inland, these typical Flemish landscapes are translated into 5 tactile carpet tile designs. Together they invite us to reflect on our roots, our identity, while also adding to the legacy that the next generation will inherit.

Back to the roots

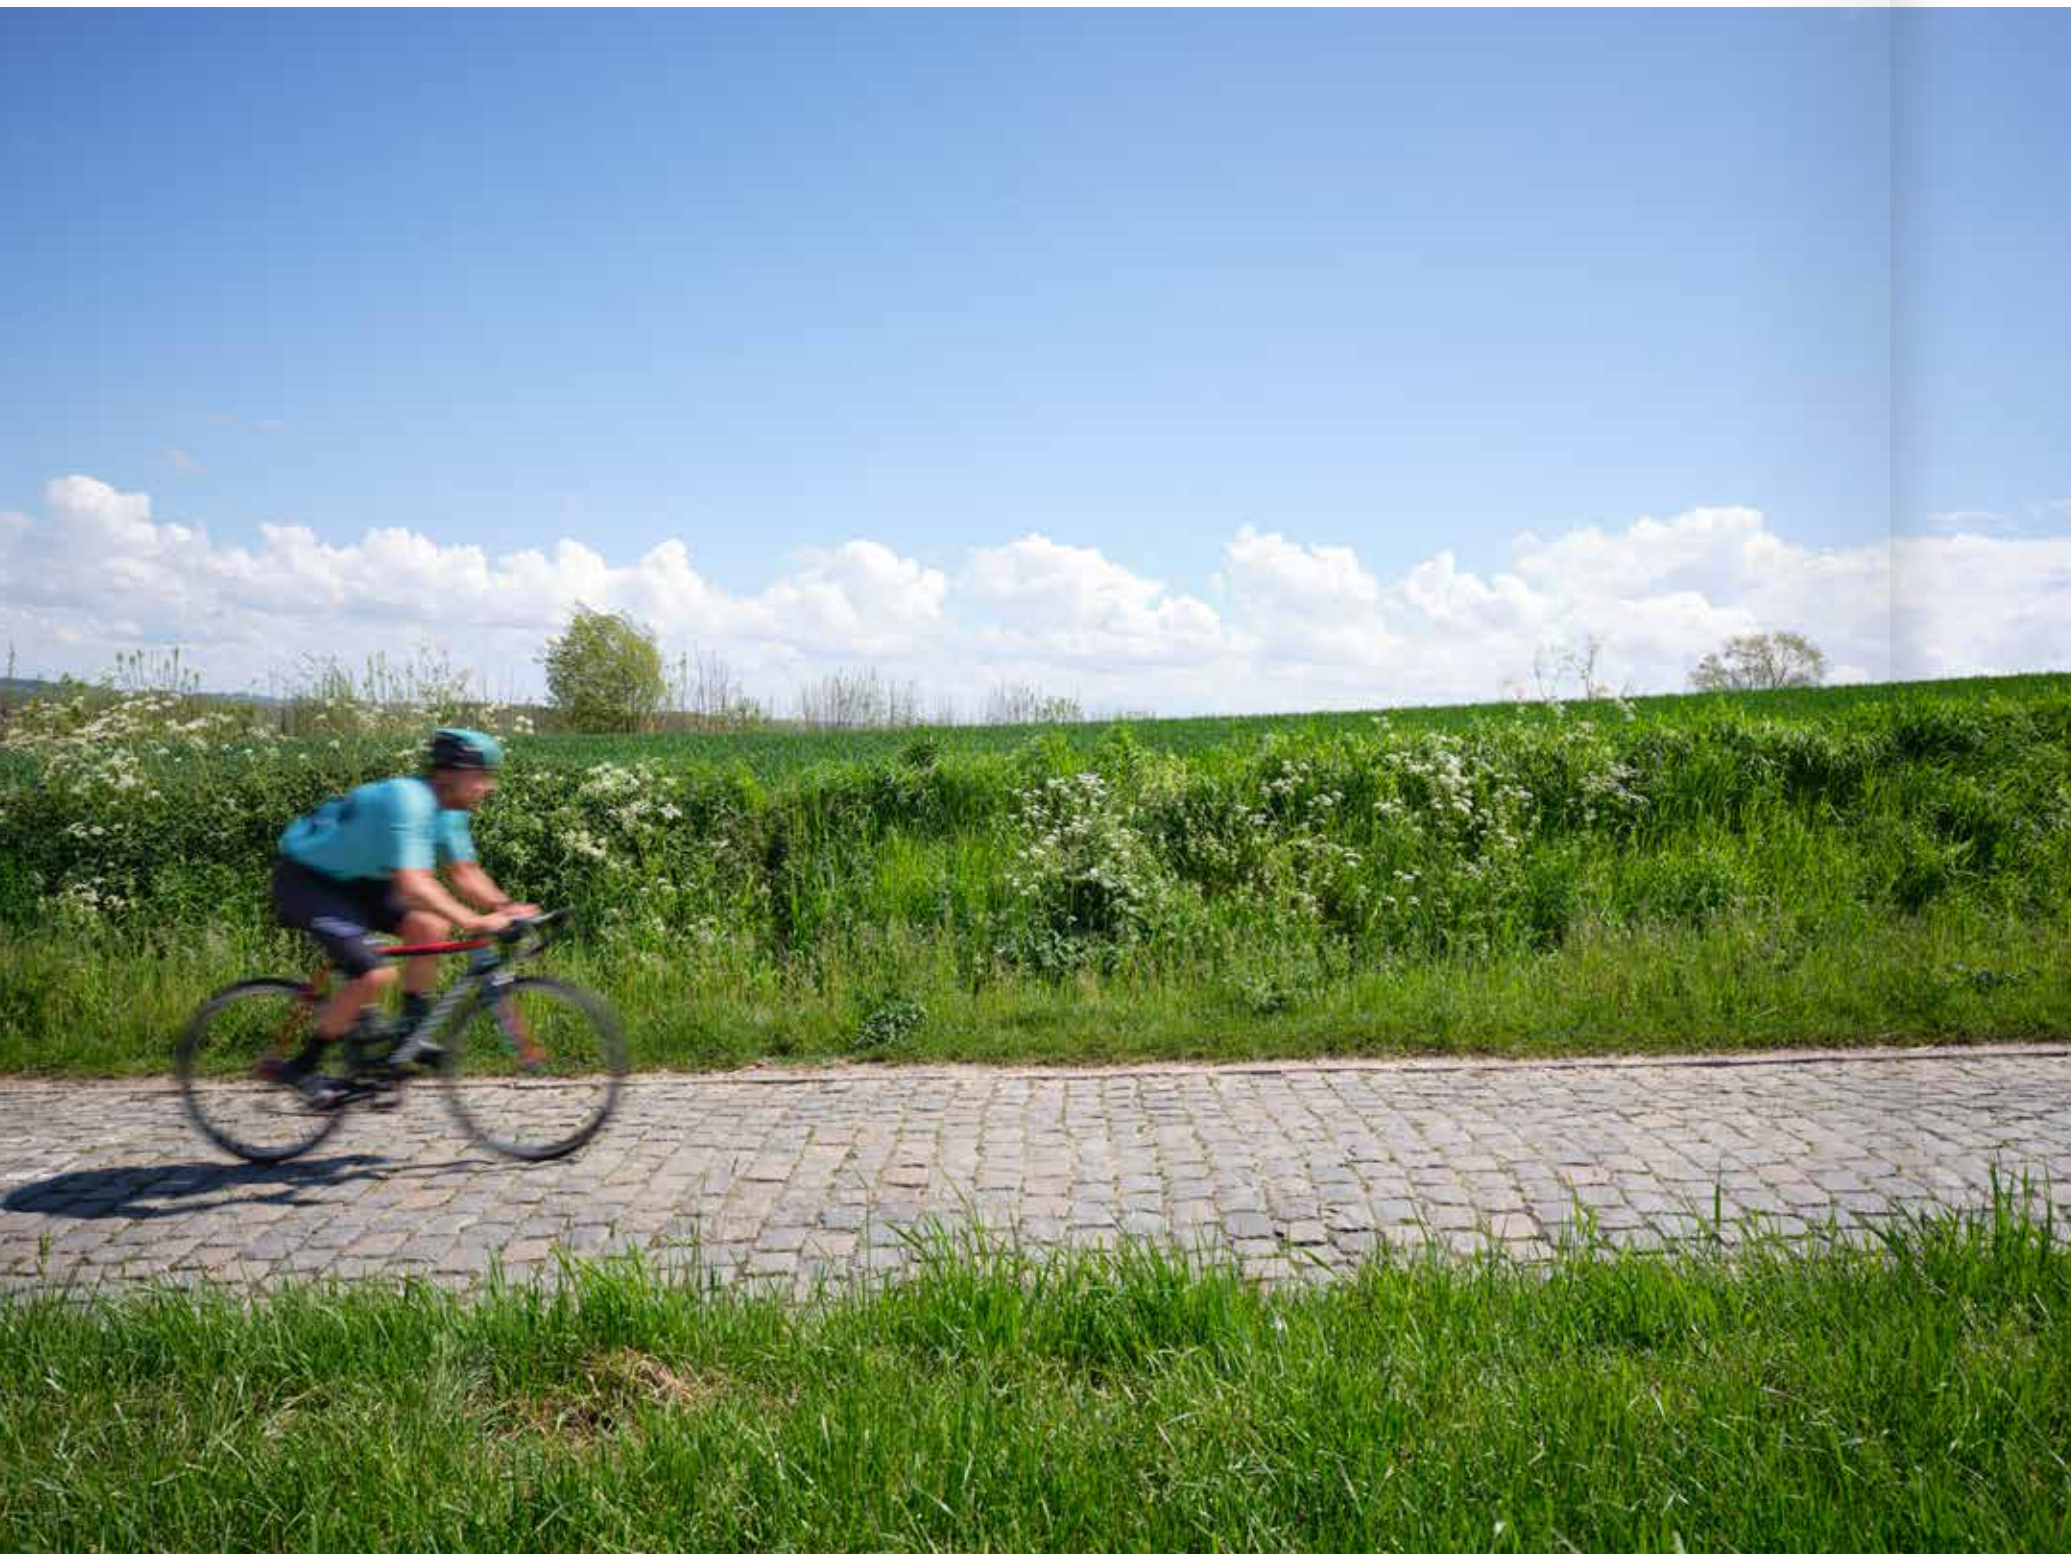

I was intrigued by the concept of heritage as a cultural tradition that helps shape a society's identity and that's passed down through generations.

For me, Heritage is about the need of society to go back to its roots, back to the earth. It's about reminiscing about timeless memories that somehow feel familiar and comforting.

Drawing inspiration from the long and thriving history of the Flemish textile industry, the Belgian artists I admire and the landscapes of my youth, Heritage weaves past and future and reflects the delicate shapes, textures and muted colours found in Flemish landscapes.

Ruben, Design & product development manager at modulyss

cobbles

You can't immerse yourself in Flemish heritage without mentioning cycling and cobblestone roads. Flanders' mythical, bone-shaking cobbles are known to make or break cyclists during iconic bicycle races, like the Tour of Flanders.

Their typical granite structure, shifting colours and irregular shapes serve as an inspiration for the speckled design of Cobbles.

haze

'Lys' in modulyss refers to the river Leie. This picturesque river is an undeniable part of our heritage and has played an important role in the Belgian linen and textile industry.

If you get up early, you can see the mist over the water before it dissipates and spreads through the landscape. This mysterious yet graceful fog, a shape in constant change, is mimicked in the pattern of Haze.

dune

In the north-west, Belgium is defined by its 65 km long coastline. The sandy beaches and grassy dunes characterise this ever-changing landscape and are home to many childhood memories. The many delicate shades and shapes the dunes take on over time are what inspired this collection.

Dune is made with 100% regenerated ECONYL® yarn and fitted with our recyclable ecoBack backing. It includes our CO₂RE programme, making your carpet tiles carbon neutral. **Cradle to Cradle Certified® Gold or Silver** (depending on the colour).

DUNE & MEADOW 683

DUNE 102

meadow

You can't take a road trip through Belgium without noticing the grasslands. These characteristic open fields shape the view of many rural regions and create a calming base for trees, flowers and often livestock. Meadow interprets the curves of this typical landscape and translates the rhythm of the grass swaying in the wind into an organic carpet tile design.

Meadow is made with 100% regenerated ECONYL® yarn and fitted with our recyclable ecoBack backing. It includes our CO₂RE programme, making your carpet tiles carbon neutral. **Cradle to Cradle Certified® Gold or Silver** (depending on the colour).

polder

Polders are a typical part of the Flemish landscape. They're one of the most fertile regions in the country and lend themselves perfectly for farming. Before the crops start to grow, you get this iconic view of the high ridges and deep furrows that form some kind of sand sculpture. This repetitive linear pattern is what defines the Polder collection.

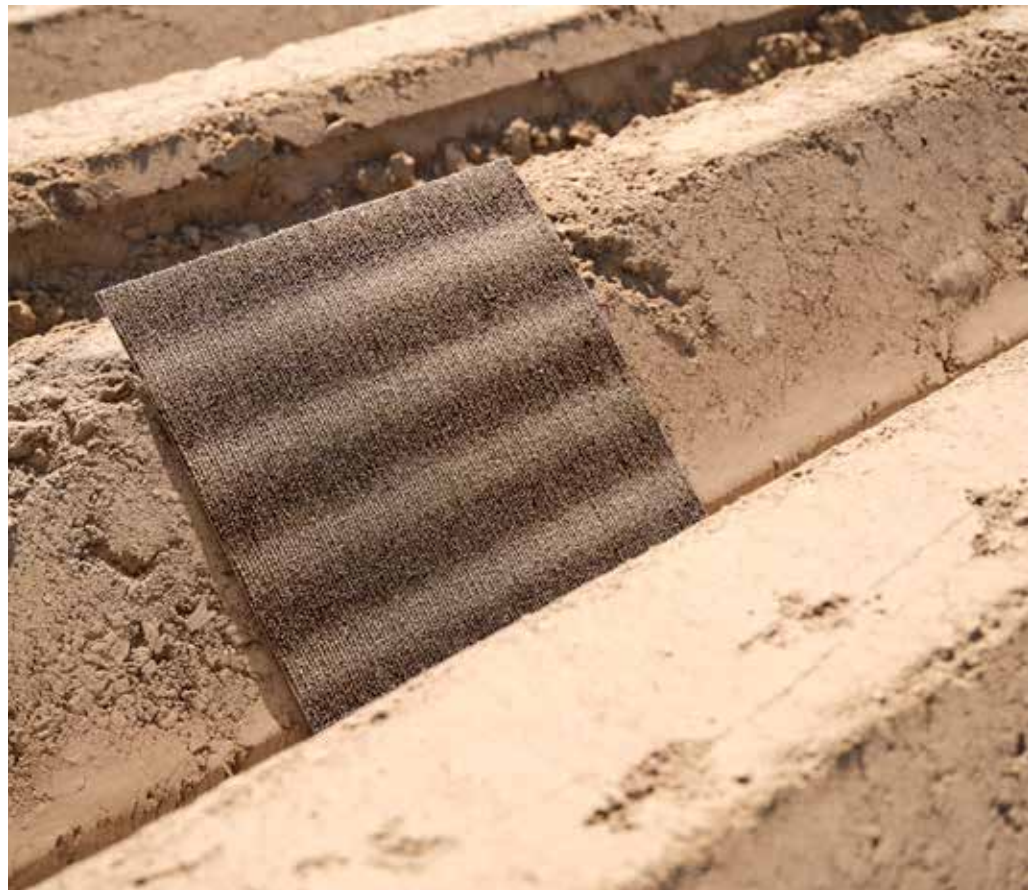

Polder is made with 100% regenerated ECONYL® yarn and fitted with our recyclable ecoBack backing. It includes our CO₂RE programme, making your carpet tiles carbon neutral. **Cradle to Cradle Certified® Gold or Silver** (depending on the colour).
